Chicco bravo stroller age limit

A Perfect Match: The Power Couple of Infant Travel The top-selling Bravo® 3-in-1 Trio Travel System combines the full-size Bravo® Quick-Fold Stroller with the #1-rated KeyFit® 30 Infant Car Seat for streamlined travel. With easy click-in compatibility, the KeyFit® 30 is secured via the Bravo® child tray, offering adapter-free convenience and effortless transitions from car to stroller. Three modes – a lightweight Frame Stroller A lightweight stroller designed to securely hold a compatible infant car seat. The frame stroller does not include its own seat in order to reduce unnecessary weight and simplify early outings. Also known as a, “Car Seat Carrier.” , a versatile travel system and a full-size toddler stroller – cater to your travel needs as your little one grows from newborn to toddler. From “less is more” to fully loaded, transition through the modes for streamlined travel at every stage. For child comfort, the Bravo® Stroller features a one-hand, multi-position reclining seat and a convenient child tray with cup holders and storage. The large, UPF-rated canopy with peek-a-boo mesh window provides privacy and protection from the elements in all 3 modes. The Bravo® Stroller showcases large, sleek wheels with treaded tires and all-wheel suspension to navigate uneven terrain. The rear-linked foot brake secures the stroller with a simple tap and the multi-position push handle adjusts in height for parent comfort. For additional parent convenience, the Bravo® Stroller has a one-hand smart fold with auto-swivel front wheels and stands independently on the wheels without the parent handle touching the ground. The large storage basket features 2 organizer pockets, mesh sides for visibility and easy front & rear access. Easiest to Install KeyFit® 30 The #1-rated KeyFit® 30 Infant Car Seat is engineered with innovative safety features that make it the easiest to install correctly. Two RideRight® A system of bubble level indicators found on either side of Chicco car seats that help verify during installation that the car seat is at the proper angle. bubble level-indicators and the ReclineSure® An infant car seat feature that uses a spring-loaded leveling foot to easily achieve proper angle of the stay-in-car base during installation. spring-loaded leveling foot help verify and achieve proper angle in the vehicle seat. The base is also equipped with premium LATCH Connectors Lower Anchors and Tethers for Children, or “LATCH,” is a car seat installation method in which the vehicle seat belt is not used. Instead, the car seat LATCH connectors attach to the lower anchors found in the seat bight of your vehicle. Refer to your vehicle’s owner manual and your car seat manual for more information. connectors for easy attachment and removal from the lower anchors in the vehicle seat. The one-pull SuperCinch® A car seat installation feature that uses force-multiplying technology to tighten the connection between the car seat and the vehicle LATCH hooks to reduce overall car seat movement. tightener applies force-multiplying technology for a secure fit with a fraction of the effort. For installation with the vehicle seat belt, clear belt routing and integrated lock-offs make it easy to position, tighten and lock the belt into place.
